

OCCUPATIONAL, TRAFFIC AND SPORTS MEDICINE

(BASIC OFFER)

Preliminary preventive medical examination and Periodical preventive medical examination

- Extended medical examination by a specialist in occupational medicine, traffic and sports
- Basic anthropometric measurements.
- Laboratory tests: hemogram, SR, glucose, urine
- Cholesterols or liver tests - according to the medical indication. and job specificities; determined by a specialist doctor
- Vision testing on the Rodatest machine
- ECG
- Spirometry
- Medical certificate.
- Report to the examiner.
- ADDED VALUE - FREE EYE EXAMINATION

We will include a FREE extensive ocular examination (standard price 40€) on the specification of a doctor specialist at a Preliminary or Periodical preventive medical examination.

The extensive ocular examination includes electronic and manual diopter measurements, biomicroscope examination, checking of the ocular background through a narrow pupil and measuring of ocular pressure (over age 40). The date for the ophthalmic examination is determined on the day of the Preliminary or Periodical preventive medical examination.

*If the patient only has a visual impairment, the ocular examination will be carried out exclusively by an optometrist up to 50 years of age.
